Comments:

Just over 61,000 tonnes of cane was processed for the week, bringing the season total to 393,228 tonnes.

This was a reasonable weekly throughput, given there was a 17-hour planned maintenance stop on Thursday.

Weekly CCS fell slightly to 13.80 units. The season-to-date CCS edged higher and settled at 13.26.

The highest CCS was 16.30 units from a rake of Q208 2nd Ratoon from the Ilbilbie productivity district.

Growers and haul-out operators are once again reminded to take care when approaching cane rail crossings, particularly on farm occupational crossings.
