Comments:

A total of 26,954 tonnes of cane was processed for the week, bringing the season total to just over 420,000 tonnes.

Factory operations stopped Wednesday morning when high vibration was recorded on one end of the shredder rotor. The shredder rotor had to be removed in order for maintenance crews to replace damaged bearings.

This halted production for the remainder of the week.

Weekly CCS dipped slightly to 13.71 units. The season-to-date CCS was marginally higher, settling at 13.29.

The highest CCS was 16.15 units from a rake of KQ228 Plant from the Mt Christian productivity district.
