### Comments:

Plane Creek Mill crushed 54,263 tonnes of cane for the week, bringing the season total to nearly 1.3M tonnes.

The major cause of lost time for the week was a choke on No. 5 bagasse belt followed by high vibration on the shredder master turbine upon restart. The decision was made to uncouple the turbine to allow processing to continue.

The average weekly CCS was 11.13 units. The season-to-date CCS fell below 14 for the first time since week 21, closing out at 13.97 units.

The highest CCS was 14.50 units from a rake of Q240 8<sup>th</sup> Ratoon from the Ilbilbie productivity district.

The last day of harvest for the Plane Creek Mill will be Thursday, 28 December 2023.
