#### Comments:

Plane Creek Mill processed close to 61,000 tonnes of cane for the week, bringing the season total to just under 518,500 tonnes.

Average weekly CCS came in at 13.53 units, with the season-to-date average at 12.52.

Bin weights continue to hold at an average 3.88 tonnes for the week.

Standover cane made up almost 22 per cent of the week's cane supply. The high proportion of standover continues to impact factory throughput, lowering both CCS averages and crushing rate.

The highest CCS honour for the week was once again a rake of Q228 plant cane from the Koumala productivity area with a CCS of 16.30 units.

Please remember to use your train brain and always give way to cane trains.
