Comments:

Plane Creek Mill processed just under 59,000 tonnes of cane for the week, bringing the season total to just over 577,000 tonnes.

Average weekly CCS came in at 13.16 units, with the season-to-date average at 12.59.

Bin weights slipped to an average 3.83 tonnes for the week.

Standover cane made up almost 33 per cent of the week's cane supply. The high proportion of standover affected factory throughput, lowering both CCS averages and crushing rate.

The highest CCS honour for the week was a rake of Q208 first ratoon cane from the Koumala productivity area with a CCS of 16.70 units.

Please keep your train brain switched on. Be alert, stay clear of our rail network and always give way to cane trains.
