Comments:

Plane Creek Mill processed just over 62,200 tonnes of cane for the week, bringing the season-to-date total to almost 696,000 tonnes.

Average weekly CCS climbed to 14.35 units, with the season-to-date average now sitting at 12.85.

Average bin weights remained steady at 3.9 tonnes.

Standover cane made up almost 24 per cent of the week's cane supply and continues to suppress both weekly CCS and crush rates at the factory.

The highest CCS honour for the week was a rake of Q240 plant cane from the Koumala productivity area with a CCS of 17.00 units.

Growers and haul-out operators are reminded to take care when approaching cane rail crossings, particularly those that run across farms.
