Comments:

Plane Creek Mill processed about 59,700 tonnes of cane for the week with the season to date total at just under 929,000 tonnes.

Average weekly CCS jumped to 15.51 units – an increase of 0.31 on the previous week. The season average is now sitting on 13.41.

Average bin weights were once again respectable at 3.96 tonnes for the week.

Standover cane once again made up just over 10 per cent of the week's cane supply and continues to suppress weekly CCS and crush rates.

The highest CCS honour for the week was a rake of SRA 26 plant cane from the Bollingbroke productivity area with a CCS of 18.00.

It's pleasing that no incidents were reported around our rail network during the recent Queensland school holidays and long weekend.

Please remember to use your train brain and always give way to cane trains.
