Comments:

Just over 62,000 tonnes of cane were crushed for the week, bringing the season total to almost 530,000 tonnes.

This was a good weekly throughput, given there was a 13-hour planned maintenance stop and a delayed restart while crews repaired a failed juice valve.

CCS figures improved by 0.32 of a unit over the previous week, to average 14.24 units.

It pushed the season to date CCS past 13 units for the first time this year, closing out at 13.12 units.

The highest CCS was 16.50 from a rake of Q208 7th ratoon from the Westhill productivity district.
