Comments:

Plane Creek Mill crushed about 61,300 tonnes of cane for the week, bringing the season total to nearly 910,000 tonnes.

Widespread light rain earlier in the week suppressed the overall weekly CCS result, which increased by a modest 0.1 of a unit over the previous week to close at 15.40.

The season average now sits at 13.84 units.

Mill availability was good at 90%. However the crushing rate was limited by high CCS levels, particularly towards the end of the week.

The highest CCS for the week was 18.0 units from a rake of Q208 Plant in the Dawlish productivity district.

Please remember to use your train brain and always give way to cane trains.
