Comments:

Plane Creek Mill crushed just under 64,000 tonnes of cane for the week, bringing the season total to nearly 254,000 tonnes.

Weekly throughput was impacted by the failure of No. 5 pan condenser on Tuesday and a bagasse choke upon restart.

Overnight drizzle and showers on Wednesday resulted in a five-hour cane supply shortfall on Thursday morning.

There was a welcome 0.6 of a unit spike in CCS levels, taking the season-to-date CCS to 12.75 units. Average bin weights continued to improve.

The highest CCS was 16.00 units from a rake of KQ228 Plant from the Mainline productivity district.
