Comments:

Plane Creek Mill crushed just under 46,000 tonnes of cane for the week.

Persistent rain across the region during the latter part of the week had a major impact on cane supply.

Average weekly CCS was 13.26, well down from the previous week's 14.58 units due to the wet field conditions.

The highest CCS was 15.90 units. The honours were shared by growers in the Koumala and Carmila productivity districts.

The recent weather event has brought harvesting operations to a halt.

We are working with the harvesting sector to determine a restart date, and are focused on processing the remaining Plane Creek crop.
