Comments:

Proserpine Mill's weekly throughput climbed to 84,000 tonnes this week, which was just below budget.

This brought the total tonnes crushed for the season to just over 405,000 tonnes, which is about a quarter of the total estimated crop.

The average weekly CCS was also within the budgeted predictions, climbing above 14 units for the first time this crushing season.

The highest CCS sample was 15.98 units from a rake of ratoon kQ228 in the Lethebrook Productivity District.

Please remember to use your train brain and always stay alert around our cane rail network.

Our cane trains are working around the clock, seven days a week.
