

Weekly production figures

Wilmar Sugar Proserpine Mill Week 17, ending 22 October 2022

	This week	Season to date
Cane crushed	63,441	1,095,315
Average bin weight	9.79	9.70
CCS	15.06	14.18

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q183	24.51	15.24	SP80	4.97	15.00
Q208	22.42	15.22	Q232	4.74	14.63
Q240	18.52	15.01	Q242	4.34	15.35
SRA9	5.17	14.74	Q253	3.33	14.84

Comments:

Proserpine Mill experienced a significant wet weather stop in the latter half of the week, due to widespread rain. This, along with some factory issues, restricted weekly throughput to just over 63,400 tonnes.

Rainfall totals of between 21mm and 67mm were recorded for the week. A coordinated effort from the milling, harvesting and growing sectors enabled Proserpine Mill to resume crushing over the weekend.

Average weekly CCS jumped up to 15.06 units, an increase of 0.24 units on the previous week.

The highest CCS sample was 17.38 units from a rake of Q183 plant in the Lethebrook Productivity District.

Please continue to use your train brain and remain alert around our cane rail network. Do not linger near any part of the rail network, and only cross the line using designated crossings.

Remember our locos are towing heavy loads and can take up to 1km to come to a complete stop.

Our cane trains are in operation around the clock, seven days a week during the crushing season.
