

Weekly production figures

Wilmar Sugar Proserpine Mill Week 19, ending 5 November 2022

	This week	Season to date
Cane crushed	68,656	1,208,067
Average bin weight	9.65	9.70
CCS	14.05	14.19

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	27.89	14.21	Q232	3.61	13.36
Q208	23.43	14.20	SRA9	2.74	12.47
Q183	19.47	14.47	Q242	2.46	13.27
Q253	5.45	12.78	Q252	2.35	14.25

Comments:

Reduced rainfall during the week meant Proserpine Mill crushed about 24,000 tonnes more than the previous week.

Rainfall totals of between 11mm and 46mm were recorded on Monday evening, with loading impacted as a result. The harvesting sector was able to recover quickly, and resumed normal loading by Wednesday.

Average weekly CCS dropped to 14.05 units, a decrease of 0.64 units on the previous week, as a result of the ongoing wet weather.

The highest CCS sample was 17.38 units from a rake of Q183 plant in the Lethebrook Productivity District.

Please continue to use your train brain and remain alert around our cane rail network. Do not linger near any part of the rail network, and only cross the line using designated crossings.

Remember our locos are towing heavy loads and can take up to 1km to come to a complete stop.

Our cane trains are in operation around the clock, seven days a week during the crushing season.
