

## Weekly production figures

### Wilmar Sugar Proserpine Mill Week 27, ending 31 December 2022

	This week	Season to date
Cane crushed	25,487	1,736,035
Average bin weight	9.02	9.59
CCS	11.12	13.77

#### Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q208	33.28	10.78	Q232	2.35	9.62
Q183	24.57	11.97	Q212	2.28	7.83
Q240	21.04	10.32	Q252	1.82	11.48
KQ228	3.18	10.38	Q238	1.46	10.25

#### Comments:

A fantastic effort was made by mill employees and the harvesting sector to continue crushing through Christmas.

Unfortunately wet weather forced a stop to crushing operations from Christmas afternoon until Friday. Weekly throughput was 28,000 tonnes below forecast as a result.

With the ongoing threat of wet weather impacting operations, growers have started to declare standover for the current season. Please notify our Logistics Officer if you are considering, or wish to declare, standover.

CCS levels for the week started in the mid-11s and dropped to the mid-10s by the end of the week, averaging 11.12 units overall. This was 0.40 units down on the previous week, but slightly above forecast.

The highest CCS sample was 13.43 units from a rake of Q183 ratoon in the Cannon Valley Productivity District.

With school holidays under way, we ask parents and carers to remind children that cane trains will continue to operate into January this season. Please keep your train brain switched on. Be alert, stay off our rail network and always give way to cane trains.
