

Weekly production figures

Wilmar Sugar Proserpine Mill Week 2, ending 25 June 2023

	This week	Season to date
Cane crushed	57,167	62,012
Average bin weight	9.65	9.64
CCS	13.25	13.22

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	25.65	13.64	SRA9	5.28	12.85
Q208	20.03	13.38	Q253	3.82	12.54
KQ228	18.63	13.75	Q242	2.48	10.81
Q183	12.32	13.56	Q238	2.00	12.69

Comments:

Throughput for the week was 57,167 tonnes, which was below budget. This was predominantly due to start up issues in the first part of the week. Factory performance had largely settled by the second half of the week.

The new pan 3 is expected to be fully commissioned by the end of next week, which should see production rates lift further.

We wish to thank those employees and contractors who worked through the Proserpine Show public holiday, as this resulted in Friday and Saturday being the highest production days for the season to date.

CCS results are trending above budget, at 13.25. The highest CCS sample was 15.43 from a rake of plant KQ228 in the Lethebrook productivity district.

There was a collision between a car and a cane train over the weekend. Fortunately, no one was injured. However this is a timely reminder to always check for rail traffic before crossing the cane rail network.

Now that school holidays have commenced across Queensland, we urge parents and guardians to remind their children about the dangers of playing on or near the cane rail network.
