Comments:

A great effort from the milling, growing and harvesting sectors resulted in another week of improved production. The factory processed 83,114 tonnes for the week – nearly 4,000 tonnes above budget.

Average weekly CCS came in 0.70 units above budget, sitting at 13.90.

The highest CCS sample for the week was 16.04 from a rake of ratoon Q240 in the Glen Isla productivity district.

Boiler 3 was taken offline on Saturday night to conduct some necessary repairs. Our Logistics Officers liaised with the harvesting sector on the impact to loading.

As always, please remember to use your train brain and take care around our cane rail network. Our cane trains are working around the clock, seven days a week.
