Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	23.10	13.62	Q183	5.71	13.72
kQ228	21.77	14.54	Q232	4.52	12.71
Q208	18.77	13.86	SRA9	3.47	12.93
Q253	6.34	11.41	SP80	2.44	14.65

Comments:

Showers that commenced on Sunday afternoon caused a stop in cane supply from Tuesday through to the end of the week.

Up to 63mm of rainfall was recorded across the region. As a result, only 13,255 tonnes of cane were able to be processed during the week.

The logistics team is continuing to liaise with the harvesting sector to determine when a resumption of harvesting may commence.

Our operations team utilised the forced downtime to carry out maintenance and repairs.

While the average CCS for the week still came in above budget at 13.64 CCS, this was down on the previous week due to the wet weather.

The highest CCS sample for the week was 15.25 from a rake of ratoon KQ228 in the Lethebrook productivity district.

As always, please remember to use your train brain and take care around our cane rail network. Our cane trains are working around the clock, seven days a week.
