Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	26.9	12.95	Q253	4.9	13.44
Q208	24.9	12.71	SRA21	1.5	11.94
Q183	20.7	12.63			
KQ228	16.0	14.99			

Comments

Proserpine Mill resumed factory operations on Tuesday 2 July after a wet weather stop.

The factory experienced some start-up issues in the early part of the week and, as a result, only 33,000 tonnes of cane were processed for the week.

Factory operations improved towards the end of the week.

The average weekly CCS came in above budget at 13.40.

The highest CCS sample of 17.08 was from a rake of plant KQ228 in the Lethebrook productivity district.

With school holidays ending across Queensland, we want to thank all parents and caregivers for keeping their children safe and off the cane rail network.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains are working around the clock, seven days a week.

Comments

The factory resumed operations on the 2nd July after a delay due to wet weather. There were some start-up issues in the early part of the week, as a result, only 33,000 tonnes of cane were able to be processed for the week. The factory had settled down well towards the end of the week.

The weekly CCS came in just over 1 unit above budget, sitting at 13.40.

The highest CCS sample for the week was 17.08 from a rake of plant KQ228 in the Lethebrook productivity district.

We want to remind the public to always give way to cane trains, and only cross the line at designated road crossings

Now that school holidays have ended, we wish to thank all parents and caregivers for their part in keeping their children safe and off the cane rail network. Please continue to remind them to stay clear as they travel to and from school.
