Comments

Proserpine Mill processed just over 69,000 tonnes of cane for the week, bringing the season-to-date total to more than 405,000 tonnes.

Throughput was below budget, mainly due to scheduled maintenance and an extended stop caused by industrial action on Friday.

Average weekly CCS came in slightly above budget at 13.78 units.

The highest CCS was 16.50 units from a rake of plant KQ228 from the Lethebrook productivity district.

Please remember to use your train brain and always take care around our cane rail network. A fully loaded cane train can take up to one kilometre to pull up. Our cane trains work around the clock, seven days a week.
