Comments

Proserpine Mill processed just over 85,600 tonnes for the week. This was the highest weekly throughput for the year, and pushed the season total past the half-million tonnes mark.

Weekly throughput was also above budget and achieved in a week when there were two extended stoppages caused by industrial action.

Average weekly CCS came in slightly above budget at 14.19 units.

The highest CCS was 17.11 units from a rake of plant KQ228 from the Lethebrook productivity district.

Please remember to only cross cane rail lines at designated crossings and always look out for cane trains before proceeding.

Our cane trains work around the clock, seven days a week. Use your train brain and always take care around the cane rail network.
