Comments

Proserpine Mill processed just over 63,000 tonnes of cane for the week. This was below budget due to a scheduled maintenance stop and an extended stop to repair a tube leak in boiler 4.

The average weekly CCS came in below budget at 14.11 units.

The highest CCS was 17.13 units from a rake of ratoon SRA21 from the Elaroo productivity district.

With school holidays still in progress, parents and guardians are again reminded to talk to their children about the dangers of playing on or near our cane rail network.

Please remember to "use your train brain" and always take care around our cane rail network. A fully loaded cane train can take up to one kilometre to stop. Our cane trains are working around the clock, seven days a week.
