Comments

Proserpine Mill processed 97,268 tonnes of cane for the week, which is the highest factory throughput since 2020. Thanks to all sectors of the industry for working together to achieve this great result.

We've now processed close to 970,000 tonnes of cane for the season, representing about 56 per cent of the total estimated crop.

The average weekly CCS came in slightly below budget at 14.38 units.

The highest CCS was 17.16 units from a rake of ratoon Q208 from the Kelsey Creek productivity district.

Please remember to use your train brain and always take care around our cane rail network.

A fully loaded cane train can take up to one kilometre to pull up. Our cane trains work around the clock, seven days a week.
