Comments

Proserpine Mill processed just over 69,600 tonnes of cane for the week.

This was below budget, due mainly to an injection water pump motor failure which limited crushing capacity for several days. A new motor has been sourced and is expected to be installed early this week.

The average weekly CCS came in below budget at 14.01 units.

The highest CCS was 16.41 units from a rake of ratoon Q208 from the Lethebrook productivity district.

Please only cross cane rail lines at designated crossings and always look for cane trains before proceeding.

Our cane trains work around the clock, seven days a week, so please continue to use your train brain and always take care around the cane rail network.
