Comments

Proserpine Mill processed just over 91,700 tonnes of cane for the week, bringing the season total to 1.35M tonnes.

Throughput was again above budget in another week where the factory performed well.

There was a derailment on our southern line last week which resulted in an extended line closure, however there was minimal impact on overall cane supply.

The average weekly CCS came in below budget at 13.71 units.

The highest CCS was 16.22 units from a rake of ratoon Q208 from the Kelsey Creek productivity district.

Please only cross cane rail lines at designated crossings and always look for cane trains before proceeding.

Our cane trains work around the clock, seven days a week, so please continue to use your train brain and always take care around the cane rail network.
