#### Comments

Proserpine Mill processed just over 89,000 tonnes for the week, which was the highest weekly throughput for the season to date.

Throughput was also above budget and came as result of another solid week where the factory performed well.

Average weekly CCS also came in above budget, at 13.68 units.

The highest CCS sample of 16.13 units was from a rake of Q183 plant in the Lethebrook productivity district.

Please only cross cane rail lines at designated crossings and always check for cane trains before proceeding across the line.

Our cane trains work around the clock, seven days a week, so please continue to use your train brain and always take care around the cane rail network
