Comments

Proserpine Mill processed just under 89,000 tonnes for the week, which was above budget and the second highest throughput for the season.

Proserpine also passed the halfway mark for the 2025 season during the last week and has now processed more than 865,000 tonnes of cane season to date.

Average weekly CCS came in above budget, at 14.84 units.

The highest CCS sample of 16.82 units was from a rake of Q183 plant cane in the Elaroo productivity district.

Please remember to cross cane rail lines at designated crossings only and always check for cane trains before proceeding.

Our cane trains work around the clock, seven days a week. Use your train brain and always take care around the cane rail network.
