Comments

Proserpine Mill processed just over 75,500 tonnes of cane for the week, which was above our budget forecast for week two of the season.

Average CCS also came in above budget, at 13.11 units.

The highest CCS sample for the week was 15.32 units, from a rake of Q208 ratoon cane in the Kelsey Creek productivity district.

As always, please remember to use your train brain and take care around our cane rail network. Our cane trains are working around the clock, seven days a week.

With school holidays about to begin, we also ask parents and guardians to remind their children about the dangers of playing on or near the cane rail network during this period.
