Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	40.77	13.41	KQ228	4.72	13.55
Q183	19.19	13.39	Q242	3.25	12.17
Q208	18.81	13.45	Q138	1.13	12.88
Q232	6.69	12.85	Q226	0.55	13.28

Comments:

More favourable weather conditions supported a return to normal harvesting and milling operations last week, with Proserpine Mill's weekly throughput close to 76,000 tonnes.

A scheduled stop for mill roller arcing is being planned for this coming week.

The highest CCS sample was 16.25 from a rake of first ratoon Q240 in the Lethebrook Productivity District.

Please remember to 'Use your train brain' and to always take care around our cane rail network. Our trains are working around the clock, seven days a week.
