

Weekly production figures

Wilmar Sugar Proserpine Mill Week 10, ending 5 September 2020

	This week	Season to date
Cane crushed	93,695	716,525
Average bin weight	9.43	9.42
CCS	14.28	13.55

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q208	29.41	14.42	KQ228	15.48	3.014
Q240	24.76	14.16	Q238	14.15	2.881
Q183	18.14	13.99	Q252	14.92	1.694
Q232	5.673	13.88	Q242	13.69	1.594

Comments:

Proserpine Mill's weekly throughput was 93,695 tonnes of cane – the third week running the factory has processed more than 90,000 tonnes.

A 12-hour maintenance and cleaning stop is scheduled for Wednesday of this week.

A run of fine weather is creating favourable harvesting conditions, however the drier weather appears to be causing crop yields to level out.

CCS climbed to an average of 14.28 for the week.

The highest CCS sample was 16.88 from a rake of plant KQ228 in the Gunyarra Productivity District.

Motorists and the general public should by now have seen or heard our safety message: 'Use your train brain'. This is especially important now that the sugar cane crushing season is in full swing.

Please stay alert around our cane rail network, obey signs and signals, and always give way to cane trains.

Tony Marino
Cane Supply Manager
Proserpine Region
