Q232	6.11	14.63	Q247	0.58	16.32

#### Comments:

Proserpine Mill processed close to 88,500 tonnes of cane for the week – a good weekly throughput given there was a scheduled maintenance stop on Wednesday.

Harvesting conditions continue to be favourable and the crop is cutting at about 99% to estimate.

Weekly CCS rose strongly to 15.23, breaking the 15 unit level for the first time this season.

The highest CCS sample was 17.82 from a rake of fourth ratoon Q183 in the Lethebrook Productivity District.

We urge the travelling public to 'Use your train brain' and always give way to cane trains.
