Comments:

Proserpine Mill processed close to 70,500 tonnes of cane for the week. The scheduled maintenance day on Wednesday was completed successfully.

Harvesting conditions continue to be favourable and the crop is cutting at about 97.5% to estimate.

CCS for the week increased to 14.79, however is still tracking below budget.

The highest CCS sample was 16.77 from a rake of first ratoon Q183 in the Kelsey Creek Productivity District.

We continue to urge the travelling public to take care around our cane rail network. Please use your train brain and always give way to cane trains.
