

Weekly production figures

Wilmar Sugar Proserpine Mill Week 17, ending 23 October 2021

	This week	Season to date
Cane crushed	82,548	1,250,529
Average bin weight	9.30	9.56
CCS	14.64	14.47

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q208	29.58	14.95	Q242	3.28	14.11
Q240	23.28	14.45	Q252	1.55	14.88
Q183	22.65	14.65	SRA9	1.36	13.62
KQ228	5.29	14.13	Q124	1.05	14.59

Comments:

Proserpine Mill processed more than 82,000 tonnes of cane for the week.

The factory has now crushed a total of 1.25M tonnes – almost 80 per cent of the total estimated crop.

The scheduled maintenance day last Thursday to arc weld mill rollers went well.

Harvesting conditions were disrupted by storms and some hail during the week. The rain also suppressed CCS, which averaged 14.64 units for the week.

The highest CCS sample was 16.90 from a rake of first ratoon Q240 in the Up River Productivity District

The crop continues to cut at about 97.4 per cent to estimate.

The last day of harvesting for the 2021 season is currently expected to be Thursday 18 November 2021.

This advice will be reviewed regularly and any changes advertised through Wilmar Sugar's GrowerWeb and this weekly production report.

Remember to use your 'train brain' around our cane rail network. Approach all level crossings with caution and always give way to cane trains.
